

# Creative Subjects

## Formal Curriculum - Priesthorpe

At key stage 3, the creative design curriculum is intended to promote strong links between art and design technology (DT). Learners have four lessons of creative design per fortnight and these are structured in blocks of art and DT. In art lessons, pupils study artists and concepts before creating what they have designed in DT and textiles. West SILC students are taught within mainstream classes and the learning is differentiated to suit individual need. Students are taught within the creative department where they have access to a range of specialist resources and teaching. Key concepts explored include: line, tone, colour, shape, pattern, form and texture. Pupils work with a range of media to produce paintings, drawing and sculpture. At key stage 4, students have the opportunity to study art at GCSE level.

## Formal Curriculum - Priesthorpe

At key stage 3, students have two music lessons per fortnight within mainstream classes. Students study a range of musical genres from classical to grime and have the opportunity to learn how to play instruments including the keyboard and the ukulele. At key stage 4, students can select music as a mainstream option choice to study towards the RSL Performing Arts Award in Music. All music lessons are taught by specialist teachers in resourced music classrooms. <https://priesthorpe.coopacademies.co.uk/music/>

## Formal Curriculum - Priesthorpe

At key stage 3, the creative design curriculum is intended to promote strong links between art and design technology (DT). Learners have four lessons of creative design per fortnight and these are structured in blocks of art and DT. In art lessons, pupils study artists and concepts before creating what they have designed in DT and textiles. In addition to four lessons of creative design, key stage 3 students also have one food technology lesson per fortnight. Learners have the opportunity to participate in practical lessons as well as studying food theory, diet and health. West SILC students are taught within mainstream classes and the learning is differentiated to suit individual need. Students are taught within the creative department where they have access to a range of specialist resources and teaching. At key stage 4, students have the option to select courses in Engineering, Construction, Textiles or Hospitality and Catering.
